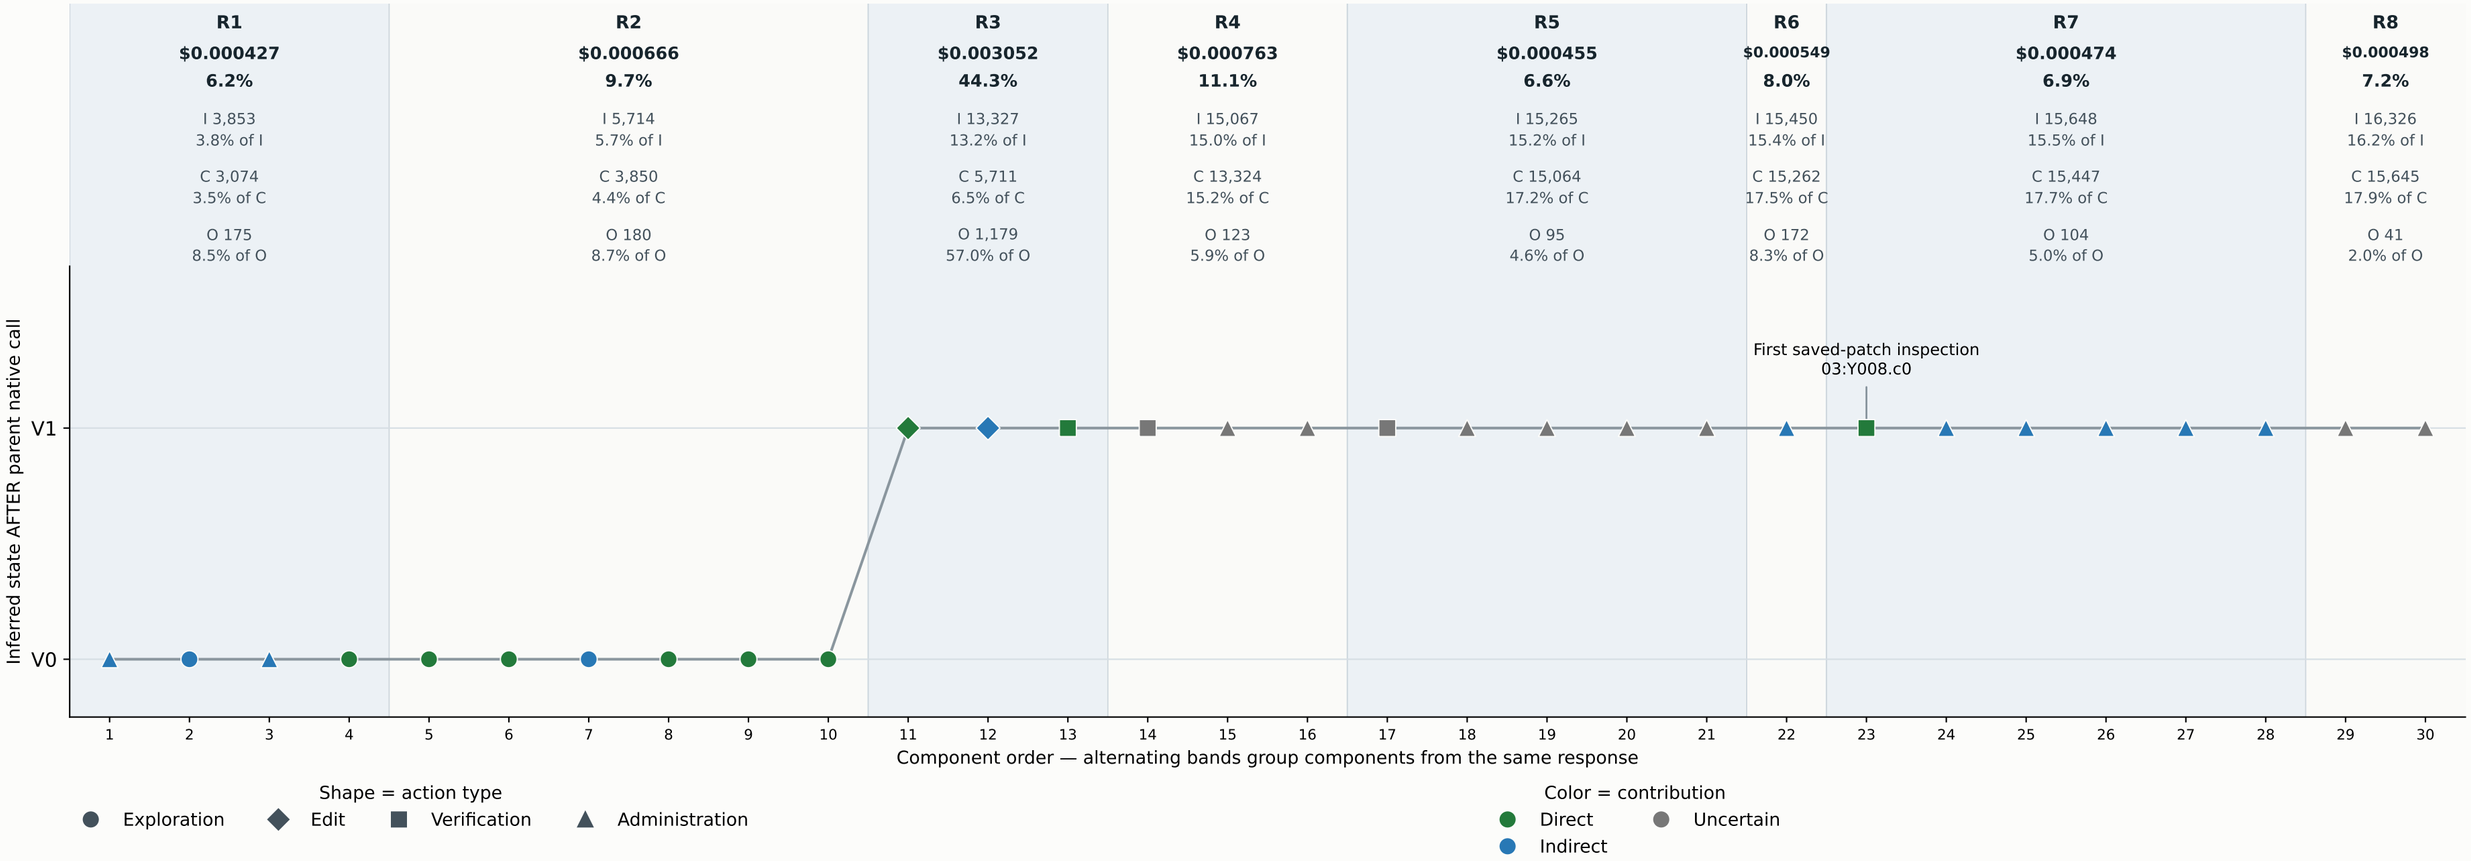
Luna · task 03 — response costs over work progression

Recorded totals: input 100,650 (cached 87,377) | output 2,069 | USD 0.00688494 | 8 responses / 30 components



Each band is one response. Bold % = share of run USD. I/C/O percentages use their respective run token totals; C is included in I. Values rounded; exact shares in CSV.

USD is harness-recorded. Shared component costs remain allocated estimates. Compound-call internal states are unresolved; independent checkpoints are UNTESTED.

Display grouping: Indirect combines source indirect, no demonstrated contribution and legacy non-direct; original annotations and scores are preserved.
