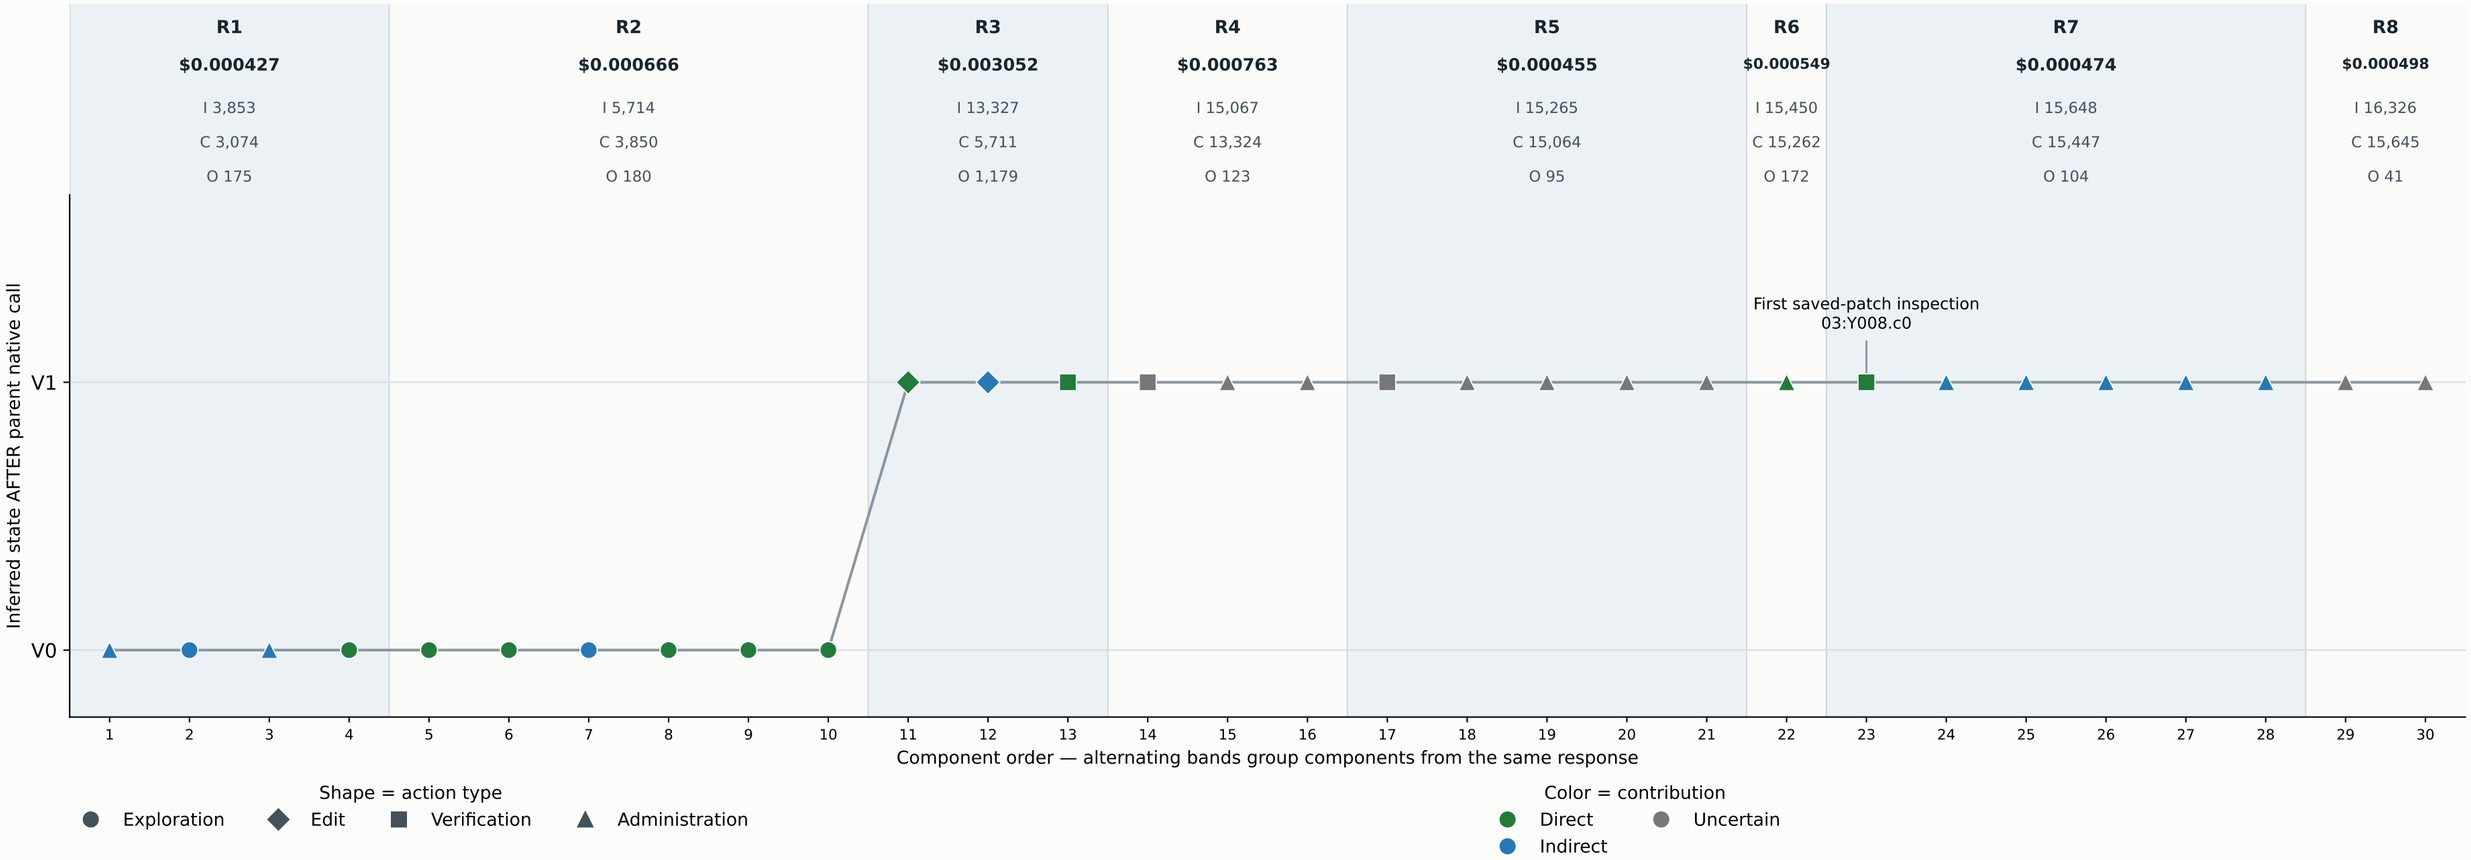
Luna · task 03 — response costs over work progression

Recorded totals: input 100,650 (cached 87,377) | output 2,069 | USD 0.00688494 | 8 responses / 30 components



Each band shows one recorded response budget, once. I = input; C = cached input (included in I); O = output. USD labels rounded; exact values in CSV.

USD is harness-recorded. Shared component costs remain allocated estimates. Compound-call internal states are unresolved; independent checkpoints are UNTESTED.

THREE-LABEL VIEW: indirect = assessed non-direct effort, including navigation/support/overhead; only direct receives contributing-effort credit.
