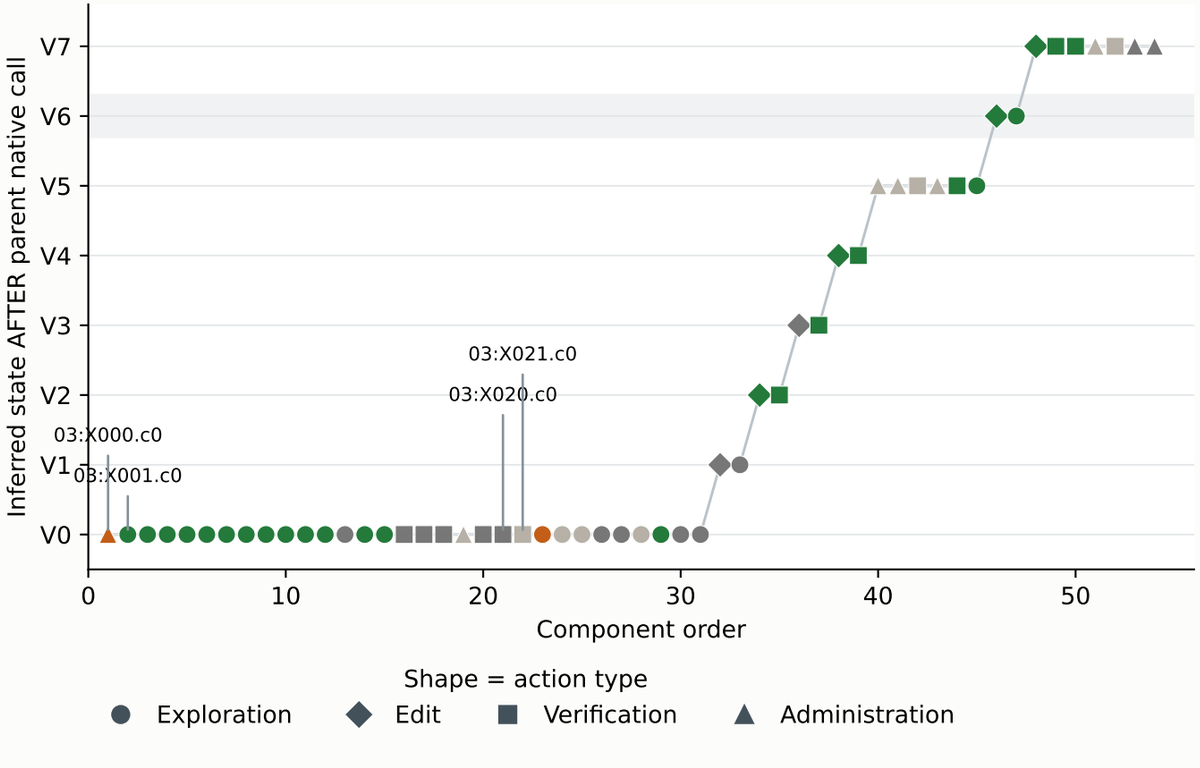
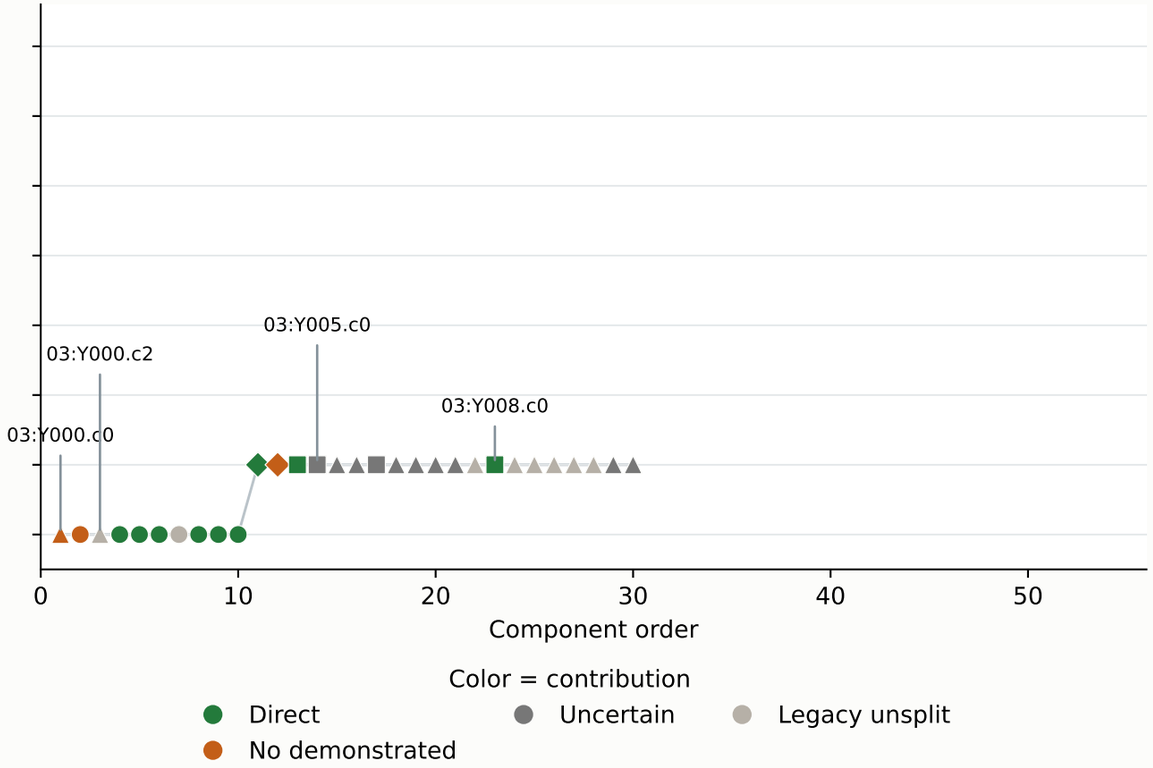
Archived example: evaluation task 03 — flipt-io

MODEL-CODED LABELS / 10 CURRENT REVIEWS | Archived final: resolved; independent checkpoints: UNTESTED

gemini-3.7-flash
54 components | 53 calls | 51,678 run output tokens



gpt-5.6-luna
30 components | 10 calls | 2,069 run output tokens



States follow parent calls; gray bands mark uncertain inferred states. Execution timing inside compound calls is unresolved.

Recorded response tokens joined; shared-component values are equal-share estimates (linked tables). Faint = known unexecuted.
