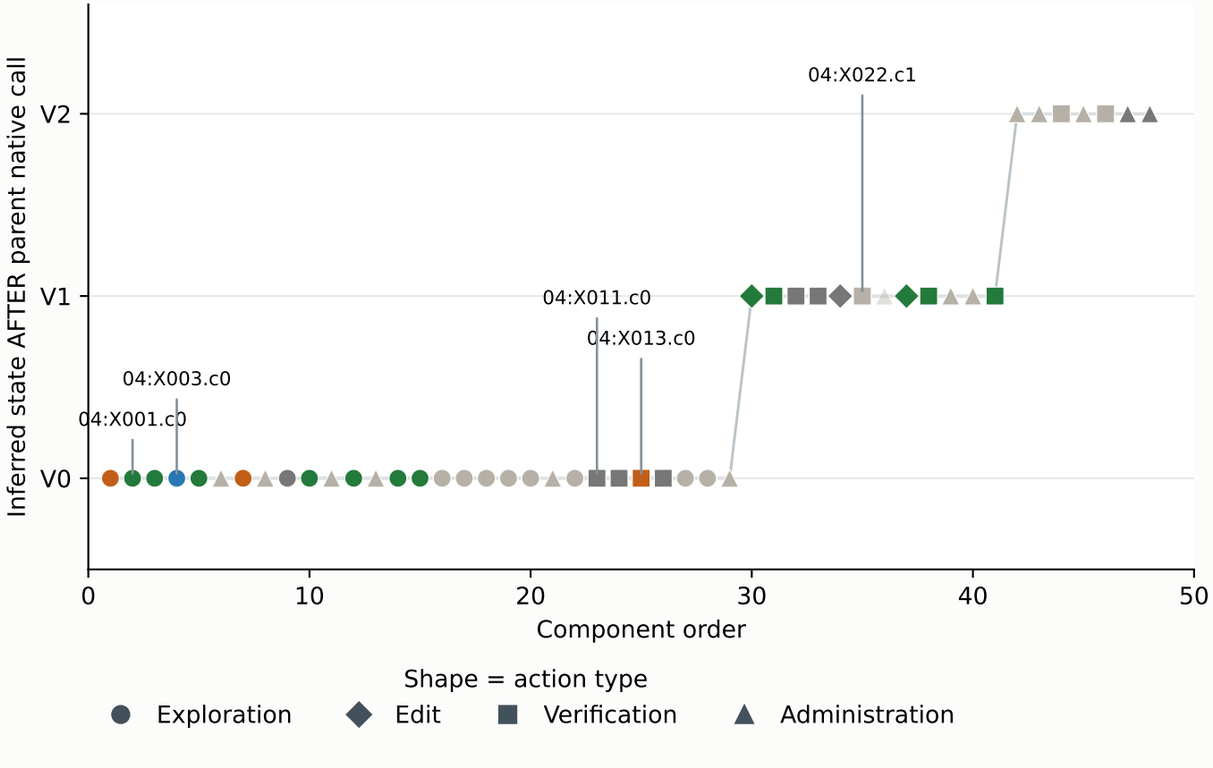
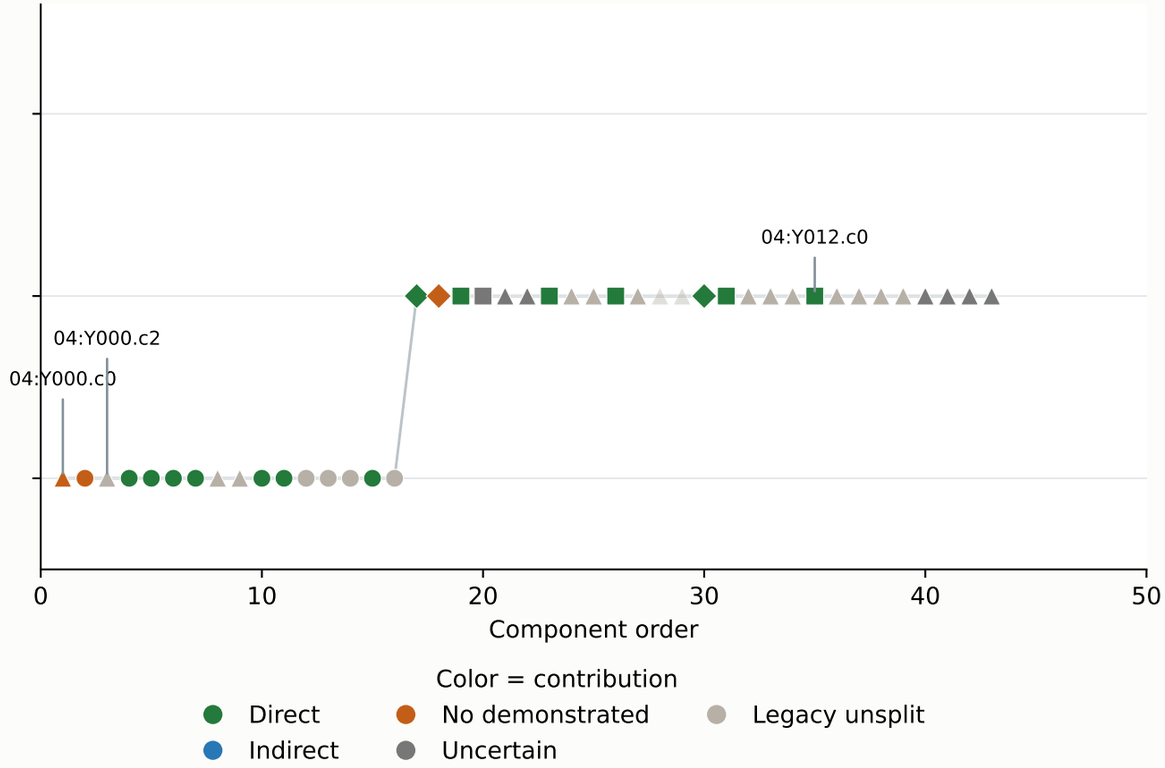
Archived example: evaluation task 04 — flipt-io

MODEL-CODED LABELS / 10 CURRENT REVIEWS | Archived final: resolved; independent checkpoints: UNTESTED

gemini-3.7-flash
48 components | 31 calls | 18,961 run output tokens



gpt-5.6-luna
43 components | 15 calls | 3,025 run output tokens



States follow parent calls; gray bands mark uncertain inferred states. Execution timing inside compound calls is unresolved.

Recorded response tokens joined; shared-component values are equal-share estimates (linked tables). Faint = known unexecuted.
